

GP-160 SYLVR

Sitting right on the border of a “baby” grand and “studio” grand label, the “160 Sylvr” deftly does both: fits a smaller room without overpowering the space, but also provides a full sound easily mistaken for a much larger grand. Taking advantage of Perzina’s signature tail design, the piano has dramatically larger strings and soundboard area than other pianos in its price range and size (164cm / 5’5”) and delivers a sound that is clear, complex, and very responsive.
